

VIDICENTER 3.0

OVERVIEW

VidiCenter is the back-office solution designed as the ideal complement to VidiReports. VidiCenter securely **gathers audience metrics** from all of your installed VidiReports units and automatically builds informative graphical dashboards which you can access and configure with your web browser.

Thanks to VidiCenter you can follow in real time all the major audience figures for your network such as its **viewer count, OTS and conversion ratio**. You can monitor the evolution of your audience and **compare the performance** of different locations. Now, you can also import your playlists and **precisely correlate your audience metrics to the displayed content**.

KEY POINTS
